

CITY OF PEMBROKE
MEDIA RELEASE

FOR IMMEDIATE RELEASE

JULY 14, 2009
1:15 PM

UPDATE NOTICE
CITY OF PEMBROKE WATER USERS

Water Pressure Loss and Water Discolouration
Mary Street – Trafalgar Road to Front Street/Third Avenue

As an update notice concerning works on the Pembroke Street West Reconstruction project, due to unforeseen circumstances, effective immediately and for approximately 6 hours, residents on Mary Street from Trafalgar Road to Front Street/Third Avenue will experience fluctuations/loss of water pressure and possible discolouration of the water.

When water pressure has been restored to normal, a City representative may ask to obtain a water sample from residential taps for testing to confirm water quality. If residents continue to experience discolouration in the drinking water, allow tap water to run until clear.

Thank you for your patience in this matter.
