

**CITY OF PEMBROKE
MEDIA RELEASE**

FOR IMMEDIATE RELEASE

**August 21, 2009
2:45 p.m.**

A spill has occurred on the Muskrat River. The spill has travelled downstream from the Muskrat River and is currently being contained at the dam behind City Hall. Staff of the Operations Department and Fire Department as well as an environment services clean up company are on site and are removing the contents of the spill at that location.

The clean up is being monitored by the Ministry of the Environment, Spills Action Centre. The cause and source of the spill is also under investigation by the Ministry.

The City of Pembroke confirms there will be no impact to the City's Water Filtration Plant and water quality will be unaffected.
